History of Steinmetz High

Steinmetz High School opened its doors on September 17, 1934 with forty teachers under the leadership of Principal Daniel F. O' Hearn. At the close of the first day of school, twenty-two hundred students were enrolled. Fifty seven of those were determined to be the first graduates in February of 1935. The School was named after Charles Proteus Steinmetz, a German mathematician and engineer who was instrumental in the expansion of the electric power industry.

Steinmetz grew steadily for the first seven years both in size and as an educational and social center in the community.

As Steinmetz matured as a school it underwent many changes; several name changes, as well as several scale renovations.

Regardless of your graduation year, we look back on all of the good memories shared on this campus. No matter what name Steinmetz will take in the future, we will always remember everything this school has done for us and what it will do for future generations to come.

To us, Steinmetz will always be
"The best in the west".
